AGENDA

- Mendeley Content
- What are the advantages of Mendeley?
- How to use Mendeley?
- Mendeley Institutional Edition

What do researchers need?

The changes in the world of research are influencing researcher needs.

Information is increasingly accessible: from articles, blogs or research and experimental data. Researchers need help determining **what information is relevant** and can help them to achieve their goals.

What is MENDELEY ?

Mendeley is **a free research workflow tool and academic social network** that enables and empowers researchers to **organize their references, connect and inspire each other, store and share their data** and **find new career opportunities**.

Reference Management

Read, organize and cite all of your research from one library.

Research network

Promote your work. Connect and collaborate with millions of researchers worldwide.

Datasets

Store, share and cite datasets with one secure online repository.

Careers

Search for science and technology jobs in institutions worldwide.

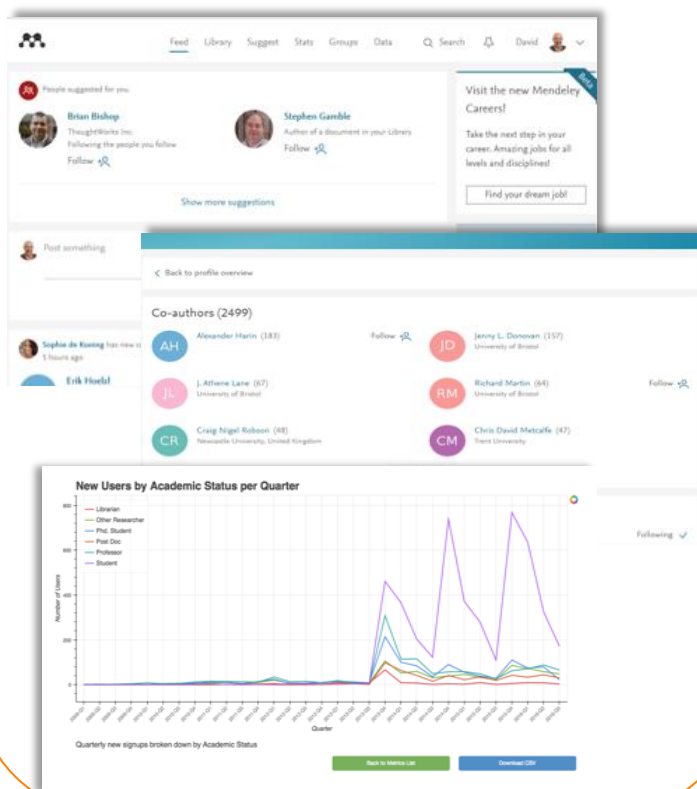

Funding

Find funding opportunities from over 2,000 organizations across the globe

Researchers and Institutions use MENDELEY for:

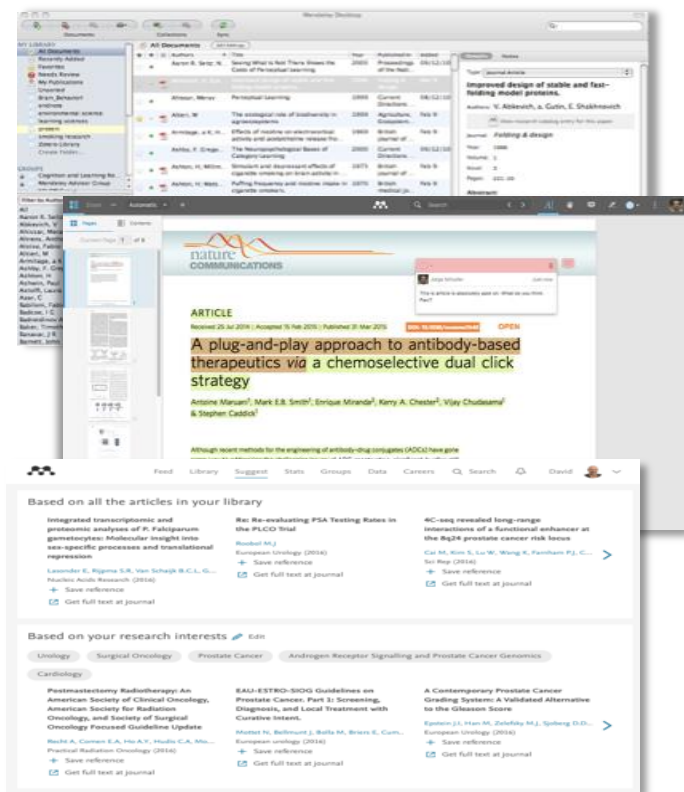

Enabling research

Research Network, people recommender, collaboration, careers & Institutional analytics

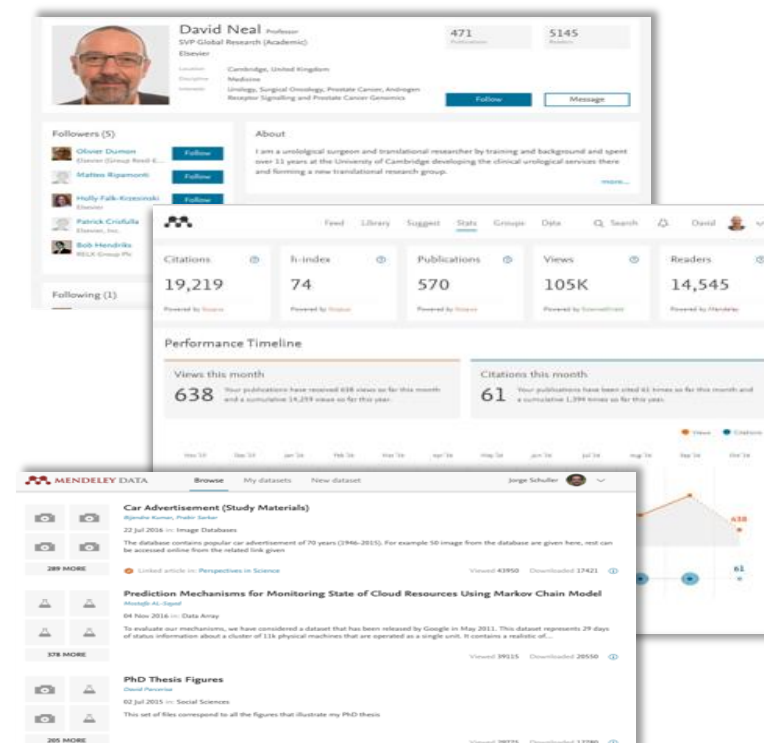

Doing research

Productivity tools including Reference Management and content discovery

Sharing research

Research profiles, Bibliometrics & Data repository services

What is MENDELEY ?

In just under 10 years, Mendeley has grown from a simple Citation plug in for Word to a Thriving research Network an Academic Workflow tool used by millions of researchers worldwide

***Over 6.5 mio users worldwide**, increasing at a rate of 30% YoY since 2014

***950K** monthly active users

***>300 M** references in the crowd-sourced catalogue

***>600 K** collaboration groups

***A community of 4,800 advisors** running **600 on-campus workshops** and events yearly

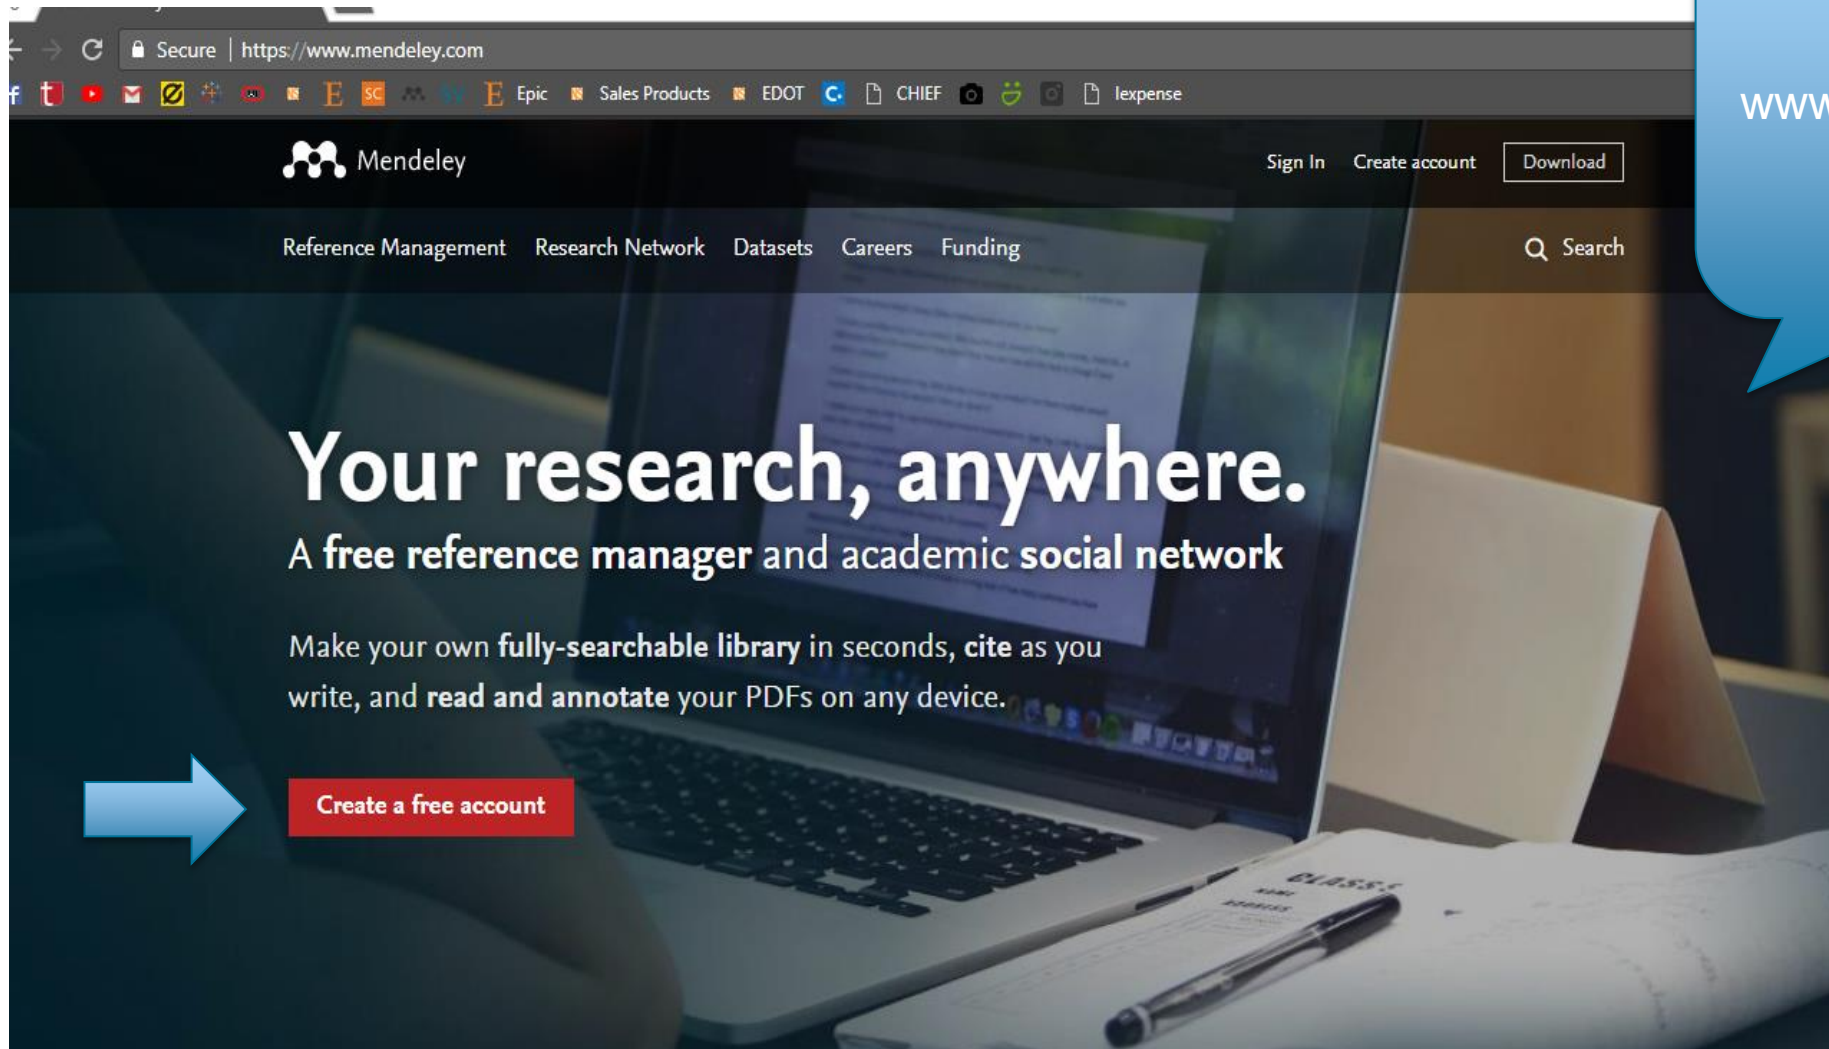

***600+ Institutions** and **10+ consortia** trust and subscribe to Mendeley Institutional Edition

Acquisition of SSRN – Social Science Research Network

- SSRN is a leading social science and humanities repository and online community that provides the online database of early scholarly research.
- Authors can post their papers and abstracts, academics and researchers can browse the SSRN data library and download them free of charge. Metrics on author rankings at a glance.
- It currently has over 2 mio members, 671k paper abstracts from over 300k authors worldwide.

it accelerates our social community strategy, brings opportunities for enhanced author relationships, and provides access to a leading resource for content.

New Horizons: From Research Paper to Pluto

Authors: P. Tavner

View research catalog entry for this paper

Year: 2015

Pages:

Abstract:

NASA's New Horizons mission, part of the New Frontiers Program, is expected to reach its primary target - the dwarf planet Pluto - on July 14 2015. Mendeley was invited to visit NASA during the close approach of Pluto and will be at NASA HQ on the day of the encounter. This report was written to mark the occasion and to share our excitement at being present for the event.

Constitute your own library on MENDELEY

You can either add documents by 'File' tab or drag & drop the files in your own desktop

The screenshot shows the Mendeley Desktop application window. The 'File' menu is open, displaying options for adding, importing, exporting, and managing documents. Callouts provide detailed instructions for several of these functions:

- Select a file or folder to add from your computer:** Points to the 'Add Files...' option in the 'File' menu.
- Watch a folder:** Points to the 'Watch Folder...' option in the 'File' menu.
- Add reference by manually entering details:** Points to the 'Add Entry Manually...' option in the 'File' menu.
- Import from another reference manager, or BibTeX:** Points to the 'Import...' option in the 'File' menu, which has opened a sub-menu showing options like 'BibTeX (*.bib)', 'EndNote XML', 'RIS', and 'Zotero Library'.
- Drag & drop pdf articles from your own desktop:** Points to a PDF icon in the document list, indicating that files can be added by dragging them into the application.

The document list on the right side of the window shows a table of references with columns for 'Year' and 'Published In'.

Year	Published In
2014	
2015	The Journal membrane t
2009	Molecular C
2010	Journal of th National Ca
1992	Geochimica Cosmoch
2012	Biogeos
2015	PLoS biol

Constitute your own library on  **MENDELEY**

When you sign in, this page will come up. Install Mendeley Web Importer.

The screenshot shows the Mendeley Web Importer page. At the top, there is a navigation bar with links: Reference Management, Research Network, Datasets, Careers, and Funding. Below this is a secondary navigation bar with links: Reference Manager, Web Importer (highlighted), Citation Plugin, Stats, Premium, and Institutional Edition. The main heading is "Mendeley Web Importer". Below the heading, a paragraph states: "Import papers, web pages and other documents directly into your reference library from search engines and academic databases. Mendeley Web Importer is available for all major web browsers." At the bottom, there are three browser icons: Chrome, Firefox, and Safari, followed by a plus sign and the text "Safari, IE & more".

This is your Mendeley Web Importer plug in. When reading articles even in Google Scholar, PubMed etc, you can click it and save it to your library

Create and use folders on MENDELEY

The screenshot shows the Mendeley Desktop application interface. The left sidebar is titled 'MY LIBRARY' and contains a list of folders: 'Unsorted', 'Economics', 'Example', 'History', 'New Horizons', 'Nihilism', 'Philosophy', 'Politics', 'Testing for Advisor', and 'Create Folder...'. A red box highlights this sidebar. A red arrow points from the 'Create Folder...' option to a text box on the right. The main window displays a list of documents under the 'All Documents' tab. The list has columns for 'Authors' and 'Title'. The documents listed are:

- San... (Title: ...logy values of ...cophaga tridac...)
- Schi... (Title: ...nt for Planet X...)
- Schr... (Title: ...on of three BR... Myriad, BRCA...)
- Schr... (Title: ...of marine birds...)
- Seyt... (Title: ...as a metabolic...)
- Shanmugam, Avinash; Ma... (Title: ...Establishing and Mana...)
- Shaw, David (Title: ...Cryoethics: Seeking lif...)
- Simons, Dorien; Clarys, P... (Title: ...Why do young adults c... focus group study...)
- Smith, Edward J.; Marsd... (Title: ...Ulysses above the sur...)

A text box on the right contains the following instructions:

- References not added to a folder will appear in 'unsorted'
- Your folders will be listed below. Drag and drop to re-order them.
- Use 'Create Folder' to enter a new folder name.

Search in your documents on MENDELEY

The screenshot shows the Mendeley Desktop application interface. The top bar includes a search field and user profile. The left sidebar contains navigation options like 'Literature Search', 'Mendeley Suggest', and 'My Library'. The main area displays a list of documents with columns for Authors, Title, Year, Published In, and Added. The right sidebar shows details for the selected article, including Abstract, Tags, Author Keywords, Publisher, URL, Catalog IDs, and Files. Callouts provide additional information:

- This is the metadata of the selected article** (points to the right sidebar details).
- Add tags to papers in your library which share a common theme** (points to the 'Tags' section in the details sidebar).
- You can click here, if you do not want this article to be public to other Mendeley users** (points to the 'Unpublished work - exclude from Mendeley Web catalog' checkbox in the 'Other Settings' section).
- If the article do not have pdf file, you can always add files from here** (points to the 'Add File...' button in the 'Files' section).
- You can also filter by Author, Author Keywords and Publication** (points to the 'Filter by Author Keywords' dropdown in the left sidebar).

Use Mendeley's PDF Viewer on MENDELEY

Mendeley has its own PDF viewer both in Desktop and Web

The screenshot displays the Mendeley PDF viewer interface. The top menu bar includes File, Edit, View, Go, Tools, and Help. Below the menu is a toolbar with icons for Select, Pan, Note, Highlight, Color, Zoom, Zoom To Fit, Fullscreen, Sync, and Help. The main viewing area shows a PDF of a chemistry article. On the right side, there is a sidebar with tabs for Details, Notes, and Contents. The Details tab is active, showing a warning message: "These details need reviewing. You can mark them as correct, or search the Mendeley catalog." Below this, there are buttons for "Details are Correct" and "Search". The article text is visible, and the sidebar also displays tags, author keywords, city, publisher, and type of work.

Callouts:

- You can read the article online
- Take notes in necessary parts
- Change the color of notes or highlights
- Highlight the important parts

ABSTRACT
 Uncovering the unique characters of continuous flow chemistry is an important stepping stone in harnessing its power for technological innovation in preparative inorganic chemistry. Compared to the traditional inorganic synthesis under one-pot solution processing conditions and hydrothermal/solvothermal/ionothermal reactions, continuous flow chemistry is a process intensification technology

Details: These details need reviewing. You can mark them as correct, or search the Mendeley catalog.

Establishing and Managing a Global Student Network

Avinash Shanmugam^{1*}, Geoff Macintyre²

Overview

The Regional Student Groups (RSG) program is a network of student groups affiliated with the International Society of Computational Biology (ISCB). Each RSG is encouraged to act independently and address the local needs of its regional student membership, a significant amount of effort is also invested in coordinating affiliation of these groups with the international student body, which provides long-term direction and facilitates communication between groups. Participating in a global student network provides students with an opportunity to network and connect with others around the globe. By sharing experiences within the network, students gain cultural insights and awareness of regional differences in scientific research and industry. In this article, we provide an overview of the tasks involved in setting-up and managing this global student network for bioinformatics. We also highlight the benefits a global student network offers, in the hope that other fields can use this to create their own global student network.

Message from Ricardo Vidal, M. Eng.

Nice paper! I might have pointers related to our advisor program.

In private groups, each member has own color to highlight

Create your research profile on MENDELEY

The screenshot shows a Mendeley profile for David Neal. At the top, there is a profile picture, name, and edit button. Below this, it lists his title as Professor, his role as Senior Group Leader and Professor of Surgical Oncology, and his affiliation with the University of Cambridge. It also shows his h-index (78) and total citations (22362). The profile is divided into several sections: 'Other IDs' (with a link to create or connect an ORCID ID and a Scopus Author ID), 'Research interests' (listing Cardiology, Prostate Cancer, and Urology), 'About' (a brief bio), 'Co-authors' (3459), 'Editorships' (2015-2017), 'Publications' (608), and 'Professional experience' (2002-Present). The 'Publications' section lists two papers: 'Alcohol consumption and prostate cancer incidence and progression - A Mendelian randomisation study' and 'Association of Plasma and Urinary Mutant DNA with Clinical Outcomes in Muscle Invasive Bladder Cancer'.

Type: Journal Article

Autophagy in pancreatic cancer pathogenesis and treatment.

Authors: R. Kang, D. Tang

View research catalog entry for this paper

Journal: *American journal of cancer research*

Year: 2012

Volume: 2

Issue: 4

Pages: 383-96

Abstract:

Pancreatic cancer is the fourth most common cancer to cause death due to advanced stage at diagnosis and poor response to current treatment. Autophagy is the lysosome-mediated degradation pathway which plays a critical role in cellular defense, quality control, and energy metabolism. Targeting autophagy is now an exciting field for translational cancer research, as autophagy dysfunction is among the hallmarks of cancer. Pancreatic tumors have elevated autophagy under basal conditions when compared with other epithelial cancers. This review describes our current understanding of the interaction between autophagy and pancreatic cancer development, including risk factors (e.g., pancreatitis, smoking, and alcohol use), tumor microenvironment (e.g., hypoxia and stromal cells), and molecular biology (e.g., K-Ras and p53) of pancreatic cancer. The importance of the HMG...

Feed and Data tabs on MENDELEY

The screenshot shows the Mendeley website interface. The top navigation bar includes the Mendeley logo, tabs for Feed, Library, Suggest, Stats, Groups, Data, and Careers, a search bar, and a user profile for David. The main content area is divided into two columns. The left column features a 'People suggested for you' section with profiles for Manol Dimitrov and Christine Buske, both from Mendeley Ltd. Below this is a section for adding documents and a post something button. The right column contains a 'New Mendeley' banner, a 'Careers' section with a 'Find your dream job!' button, an 'Install the Web Importer' section, and an 'Articles suggested for you' section. A blue callout box points to the 'Data' tab and the 'Find your dream job!' button, stating: 'Mendeley data offers researchers a safe and secure way to upload, access and browse datasets anywhere for free. The data here can also be cited and shared and often makes meeting the requirements for funding bodies all that much easier.'

Some Tips for Researchers

- **Evaluate your research area** by Scopus- Journals, Authors, citations, publications by year
- **Evaluate which journal is right for your article**
 - Use Metrics (CiteScore, IF, SNIP, SJR)
 - Use Scopus Compare Sources tool
 - Use Elsevier Journal finder
(<https://journalfinder.elsevier.com/>)

ELSEVIER

[Send us feedback](#)

Find the perfect journal for your article

Elsevier® Journal Finder helps you find journals that could be best suited for publishing your scientific article. Please also consult the journal's Aims and Scope for further guidance. Ultimately, the Editor will decide on how well your article matches the journal.
Powered by the [Elsevier Fingerprint Engine™](#), Elsevier Journal Finder uses smart search technology and field-of-research specific vocabularies to match your article to Elsevier journals.

Simply insert your title and abstract and select the appropriate field-of-research for the best results.

New guidelines for research data

Authors submitting their research article to this journal are encouraged to deposit research data in a relevant data repository and cite and link to this dataset in their article. This is a requirement for all research articles. For more information, please visit the [Researcher Academy](#).

Some Tips for Researchers

- **Writing of an article is a hard work** – finding and sorting research, preparing references, sourcing feedback..
- **Get Help from Mendeley!**
 - Generate citations and bibliography
 - Connect with colleagues, securely share papers, notes and annotations
 - Benefit from social network to identify potential collaborations
- Keep in mind the superiorities of Science Direct & Scopus over Google Scholar:
 - More reliable, scientific base
 - Peer-reviewed
 - More reliable h-index – you can exclude self citations
 - Use Science Direct Topics
 - Use related documents, personalized recommendations

Some Tips for Researchers – How to use your time more efficient?

- Use Recommendations/ related documents tool
- Use 'Export' tabs to Reference Management Systems
- Use Scopus Analysis Tools – Document analysis tool is the good point to start
- For Librarians/admins – use E-pic Dashboard!
- Use Elsevier data search engine- Search for research data across domains and types, from many domain-specific, cross-domain and institutional data repositories.
<https://datasearch.elsevier.com/#/>

How to reach the resources by yourselves?

A dark teal banner with a subtle pattern of concentric circles at the bottom. The text is white and orange.

Introducing Researcher Academy

Unlocking research potential

Formerly known as Publishing Campus, Researcher Academy provides free access to countless e-learning resources designed to support researchers on every step of their research journey.

Browse our extensive module catalogue to uncover a world of knowledge, and earn certificates and rewards as you progress.

<https://researcheracademy.elsevier.com>

How to reach the resources by yourselves?

- **Watch Scopus tutorials on various topics:**

https://service.elsevier.com/app/answers/detail/a_id/14799/supporthub/scopus/

- **Check the website below, to follow up all the current developments in Science Direct:**

<http://www.elsevier.com/books-and-journals/content-innovation>

- **Subscribe Scopus & Mendeley blogs to receive the latest developments and updates:**

www.Blog.scopus.com www.Blog.mendeley.com

- **Online resource centre where you will find detailed guides, videos and tutorials that will help you to read some of the features of Mendeley in a little bit more detail.**

<http://www.resources.mendeley.com>

- Like us on <https://www.facebook.com/ElsevierGulfAndLevant/> and keep yourself updated!

- **For further questions:** o.sertdemir@elsevier.com

Thank you!
