Guide to Resources in E-BANKING

SCOPE

Electronic banking: known as electronic fund transfer (EFT), uses computer and electronic technology as a substitute for checks and other paper transactions. EFTs are initiated through devices like cards or codes that let you, or those you authorize, access your account. Many financial institutions use ATM or debit cards and Personal Identification Numbers (PINs) for this purpose. Some use other forms of debit cards such as those that require, at the most, your signature or a scan. The federal Electronic Fund Transfer Act (EFT Act) covers some electronic consumer transactions.

SUBJECT KEYWORDS

When searching our catalog (Horizon) or the journal databases try using these subject keywords:
Banking
E-Banking
Electronic Banking
